

Part 3 - Position Description

Title:	General Practice Lead/Co-investigator
Position Reports to:	VP Product Innovations
Status:	Part-Time (0.2 FTE)
Department:	Product Innovations
Location:	Auckland
Job Description Updated:	January 2020

Position Overview

Some of the key functions will include;

- Clinical perspective for innovation on product design and development.
- Knowledge of services, clinical pathways and models of care.
- Insights on innovative care delivery methodology and systems.
- Advise and review the design and user experience team with the best user experience for health providers and users
- Designing and advising clinical methods and triage pathways to support our long term Artificial Intelligence AI research and other related products
- Understanding of current techniques for interpreting data collection and analysis and application of such data in care management.
- Liaise with external clinicians on Vensa-related matters such as in clinical forums or with medical or healthcare-related professional bodies.
- Represent Vensa as co-investigator with access to their practice/PMS databases, and participate with internal and research clinical governance, including performing or supporting audits, quality assurance activities and reviewing research publications.
- May represent Vensa externally as required as Vensa's General Practitioner Lead
